Rubber solutions

Engineering

At RubiNord, we have 30 years of experience in the rubber industry. Our know-how will benefit you when developing rubber and silicone components.

We are able to discuss technical solutions and quickly translate ideas into finished products, whether it is gaskets, membranes, buffer/dampers made of EPDM, NR, NBR rubber or silicone.

With our extensive knowledge and expertise in rubber and compounds, and especially in the field of casting technology, we can help you reach your goal for your items.

MEMBRANE
made of EPDM rubber

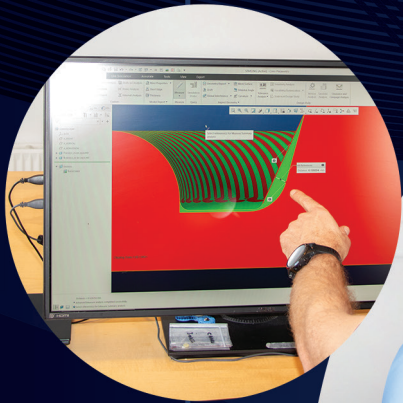

GASKET for electronic device

COVER made of silicone

FOOD CONTACT DRIVE WHEEL

made of NR/SBR rubber vulcanized direct onto
a special designed plastic part

WE ENSURE THE CORRECT QUALITY
and the correct product the first time.

Design

If you want a smooth and uncomplicated process, you can define your wishes and then we will prepare the design and create the development until you have the finished product.

With the use of 3D drawing, we advise on draft angles, parting lines and packaging surfaces.

Supply

As part of our concept, we offer logistics agreement from our facilities in Karlslunde. Together we prepare a warehouse agreement to reflect your forecast and needs.

We are responsible for production, financing, logistics and we create security and flexibility for you as a customer.

Welcomes you to a **successful collaboration**
